

Magi-Seal

Magi-Seal fabric protection is no ordinary product. This product has your back when it comes to making your furniture will last for years to come.

It contains a unique fluorochemical which is environmentally friendly and toxic-free, that aids in the best stain protection for furniture. This special additive also helps slow down yellowing, fading, and mildew.

Does Magi-Seal provide 100% protection against everything?

Magi-Seal works great for most purposes, but not all. That's not to say that Magi-Seal won't eventually be able to handle all kinds of protection! Right now, stains from corrosives and heavy dyes are still too potent for Magi-Seal's formula.

Though, the faster the spills are blotted up, the better. In all but a few cases, a damp cloth and towel can remove a fresh spill. The longer the stain settles, the harder it is to remove.

Here is a list of stains that Magi-Seal can protect against:

- Coffee, Tea, Milk, Juice
- Red Wine, Soft Drinks
- Alcoholic Beverages
- Ketchup, Chocolate, Ice Cream
- Various Food Spills, Vomit
- Oil, Grease, Human Urine, Blood

Additives in addition to Magi-Seal protection:

Ultraviolet Absorber — Our unique ultraviolet absorber additive helps cease color loss due to fabric degeneration. Magi Seal acts as a deterrent against fabric yellowing and fading. Whenever possible, place furniture away from harsh, direct sunlight.

Ultraviolet Inhibitor (Leather) — Helps reduce premature leather fading caused by exposure to ultraviolet light sources.

MagiCide Anti-Fungal — Our unique MagiCide Anti-Fungal additive is perfect for killing odors and protection against rot and mildew caused by microscopic fungi and bacteria. It protects against that musty or mildewy smell in areas of high humidity, like basements.

Anti-Static Additive (Leather) — Helps to repel airborne dust and dirt which clog the pores and damage the leather over time.
